

As a private pilot and member of AOPA, I support the AOPA Petition to allow transient traffic use of the "DC3" airports (College Park Airport, Potomac Airpark, and Washington Executive/Hyde Field) in Maryland, close to Washington. I know that the extents of 9/11/2001 have caused the government to increase security measures in certain areas of the country to protect our homeland. However, these measures should not effect those people who legally abide by the current rules and regulations that have been established for years!
